Education

Syracuse University — Syracuse, NY
School of Information Studies — August 2023 - Present
B.S. Data Analytics | **Minor:** Architecture, Computer Science — Expected Graduation: May 2028
Relevant Coursework: Applied Data Science, Big Data Analytics, Python for Information Professionals, Building Systems Design I & II, Data in Society, Information Technologies, Architectural Studio

Experience

Makerspace Assistant — Syracuse, NY
Syracuse University MakerSpace — August 2026 – Present

- Guide students and visitors in using 3D printers, laser cutters, and other fabrication equipment to turn design files into finished prototypes.
- Lead machine training and workshops on safe, correct use of shop equipment.
- Operate, monitor, and maintain machines; troubleshoot prints and cuts; clear jams; and perform routine cleaning.
- Enforce safety procedures, manage check-ins, restock materials, and open and close the space.

Undergraduate Research Fellow — Syracuse, NY
The SOURCE at Syracuse University — June 2025 – May 2026

- Developed a Python (pandas) predictive maintenance framework with a three-condition flagging system to identify HVAC underperformance in residential buildings, using sensor, occupancy, and weather data aggregated from 5-minute to 30-minute intervals.
- Analyzed heating performance across monitored units, identifying a 2.4x difference in heating issue rates and investigating factors such as building orientation, insulation quality, and sensor placement.
- Synthesized findings into a formal research paper with data visualizations and recommendations for predictive maintenance and building energy management.
- Featured in Syracuse University Magazine (Fall 2025) for research on the DOE-funded Sustainable South Campus building retrofit project.

Gaming Learning Center — New York, NY
Game Design Teaching Assistant — June 2024 – August 2024

- Co-instructed pre-teen students in JavaScript and Scratch through project-based lessons, guiding them as they built Flappy Bird and Mario Kart clones.
- Developed and delivered lessons covering object movement, sound editing, and interactive game development, helping students build and customize their own games.
- Provided one-on-one support to troubleshoot code, explain programming concepts, and strengthen students' problem-solving skills.
- Fostered student confidence and engagement, contributing to the successful completion of multiple coding projects.

Leadership and Activities

Center for Architecture — New York, NY
2019 - 2022

- Participated in architectural seminars, presentations, and events focused on design, urban design, and sustainability.
- Collaborated with peers and experts to create and present architectural proposals.
- Built physical models and produced sketches and digital designs, gaining hands-on design experience.

Black Girls Code — New York, NY
2019 - 2022

- Participated in coding workshops and programs with Black Girls Code, including themes such as gaming, artificial intelligence (AI), climate technology, and job skills.
- Learned about coding principles and technologies such as HTML and CSS, and got hands-on experience developing robots.
- Collaborated with peers and mentors to create code projects and apps linked to the taught concepts.

Skills

Programming & Data: Python (pandas, data cleaning, data analysis, predictive modeling), JavaScript, R, Haskell (introductory)
Analytics: Statistical analysis, time-series analysis, data visualization, Excel (pivot tables, reporting, data analysis)
Design & Visualization: Adobe Illustrator, InDesign, Photoshop, Rhino 3D, Revit, SketchUp, PowerPoint, dashboard design, and data storytelling
Fabrication: Laser cutting, 3D printing, custom apparel design (Adobe Illustrator + xTool), physical model-making
